STEPHEN KINGSLEY FEMI

Software Developer | Backend Engineer — Telecom & Fintech Systems

Lagos, Nigeria | 08052880962 | thekingfemi32@gmail.com | linkedin.com/in/thekingfemi32

PROFESSIONAL SUMMARY

Backend Engineer with 3+ years designing REST APIs, microservices, and provisioning/billing integrations for high-volume telecom platforms, including direct integration work with MTN, Glo, and Airtel. Skilled in real-time systems (WebSockets, JWT auth), transaction reconciliation, and SLA-driven delivery within strict compliance requirements. Experienced across the full Agile lifecycle, working closely with DevSecOps and QA to ship reliable, scalable software.

TECHNICAL SKILLS

Backend Development: Node.js, Express.js, Django, REST API Design & Integration, Microservices Architecture, WebSockets, JWT Authentication

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQL & NoSQL data modelling and query optimisation

Telecom & Transaction Systems: MTN / Glo / Airtel Aggregator & Gateway Integration, Billing & Provisioning Synchronisation, Transaction Reconciliation, SLA-Based Service Delivery

Frontend & Full-Stack: React, Next.js, JavaScript (ES6+), MERN Stack (MongoDB, Express.js, React, Node.js)

API & Quality Engineering: REST API Testing, Postman, UAT Execution, System Integration Testing, Debugging & Root-Cause Analysis

DevOps & Collaboration: Git, Jira, Agile/Scrum (sprint planning, stand-ups, retrospectives, backlog estimation), CI/CD & Automation Fundamentals, Technical Documentation

Security & Networking Fundamentals: Data Privacy & Compliance Awareness, Network Fundamentals, Cybersecurity Basics (Cisco-certified)

WORK EXPERIENCE

Backend Engineer | Venix Partners Limited, Lagos, Nigeria Mar 2024 – Present

- Built REST API integrations across 3 telecom aggregators (MTN, Glo, Airtel) supporting 6+ live VAS products, keeping provisioning/billing sync accurate within 24–48h SLA windows.
- Own end-to-end integration testing and UAT sign-off for new VAS services, coordinating closely with QA and DevSecOps ahead of every go-live.
- Cut average service-activation turnaround time by ~20% by diagnosing recurring backend integration failures through structured root-cause analysis.
- Added monitoring and alerting into delivery pipelines (Node.js/Express, PostgreSQL, Redis), catching an estimated ~25% of issues before they reached customers.
- Participate in sprint planning, daily stand-ups, and retrospectives, helping estimate and prioritise backend user stories with the wider squad.
- Write technical documentation and contribute to backend architecture decisions for new service rollouts alongside engineering leads.

Backend Engineer | Briccs International Ideal Limited, Lagos, Nigeria Dec 2023 – Oct 2024

- Maintained backend infrastructure for a bulk SMS platform processing 500K+ messages/month across 10+ enterprise clients, built on Node.js/Express with MongoDB.
- Built an automated daily traffic-reporting service, cutting manual reporting time by ~80% and improving data accuracy for partners.
- Integrated third-party SMS gateways via REST APIs and configured message-routing logic, raising delivery success rates from ~92% to 98%.
- Worked directly with backend teams at MTN, Glo, and Airtel to debug cross-network message-delivery failures and align on fixes.
- Optimised routing logic and backend infrastructure, increasing message throughput by ~30%.
- Used Postman for endpoint validation and Jira for sprint and task tracking within an Agile delivery process.

TECHNICAL PROJECTS

Mesaj (2025) — Backend for a multi-channel messaging platform (bulk SMS, WhatsApp API, voice, IVR) with scheduling, delivery reporting, and API-driven message processing. Stack: MERN. mesaj.cloud

Turnaj (2025) — Real-time backend supporting 500+ concurrent users via JWT authentication and WebSockets. Stack: Node.js, Express, PostgreSQL, Redis. turnaj.mobi

EDUCATION

B.Sc. Computer Science — Nile University, Abuja, Nigeria Oct 2019 – Jul 2023

CERTIFICATIONS & TRAINING

DevOps: Beginners to Advanced — Udemy (Oct 2025) | Cyber Ops Associate — Cisco (May 2023) | IT Essentials — Cisco (Oct 2023)
